1. About Cosmic

Cosmic is a new generation organization offering total solutions to your business through value added services and products. Our uncompromising commitment helps us in delivering innovative products & building long-term business relationships with our clients. At Cosmic, we are fully geared to ensure the best value through time-efficient, cost-efficient and quality processes. We are committed to rejuvenate the organizations by helping them utilize the underlying potential through IT.

Cosmic was founded and is led by a team of knowledgeable entrepreneurs. Cosmic is a corporate entity incorporated under the Indian Companies Act 1956. The open work environment with a free flow of ideas between the management and the employees has been a stepping-stone for the organization as well as the employees.

Ever since its inception in 1999 Cosmic has steadily added to its achievement marquee. Starting with Desktop Applications we have steadily move forward in the world of Web Technologies by providing our clients a stop solution for their application development, Designing & Hosting Services. Our accomplishments reinforce our belief in quality and excellence. Our growth has been an eventful and highly charged journey toward excellence. For past seven years, we have customized the new management practices hand in hand with e-commerce for our clientele's specific case and needs; our clientele are the best of our references, in this regard. We have amassed a wealth of continually evolving business knowledge from our experience in working on crucial issues for different sectors like the auto industry, construction industry, financial organizations, IT organizations and small and large business houses.

2. Global presence

The web technology has brought the world closer and has made information exchange easier. We have successfully bridged the geographical distance between our foreign clients by continuously upgrading our skills to fulfill their requirements. Our physical presence does not in any way affect our efficiency to handle offshore assignments.

To help our clients reach us better we have also built our sales teams which function from the main IT cities in India (Pune, Hyderabad & Bangalore) and also in Australia.

3. Methods and practices

Project Life Cycle at Cosmic

- I. Identify and explore the target client community by meticulous analysis and briefings.
- II. Set objectives and place them in form of a business plan.
- III. Choose the right technologies, softwares to execute the business plan.
- IV. Plan the time schedule and logistics to convert the business plan into stipulated technological conversion.
- V. Offer flexibility during such conversion for futuristic needs.
- VI. To provide a single point of contact, which will synchronize all aspects of project and liaise with the clients as the project develops.
- VII. To offer a consistent service back up, ensuring minimum down time, after commencement of the project.

Professional approach and Quality

Professionals at Cosmic keep abreast of the latest in IT through constant research, training and development, thereby gaining extensive insight, knowledge and experience in all areas of project business, and are always resolute to achieve better quality and productivity in our solutions. At Cosmic we endeavor to develop the best possible information technology solution using the most apt technology and with a team of fully dedicated professionals. We take supreme pride in being totally client focused and exceeding expectations through cut-above service.

4. Infrastructure

Cosmic has created the necessary infrastructure for the successful completion of large and complex projects, namely competent manpower, training programs, hardware and software facilities. Quality assurance and testing procedure, application development methodologies and documentation standards are well defined, properly documented and well propagated throughout the entire organization.

Cosmic is complete with state of the art technology. It boasts of a self-sufficient unit comprising of high-speed machines, peripherals and a strong software combination all running on a strong back-up system to ensure round the clock service.

Cosmic is proud to behold a team of upwardly mobile professionals. Application supports, e-commerce specializations, networking specializations, software development, training proficiency are the skills nurtured by our workforce. Individually as well as at the organizational level, skill sets are updated frequently in accord with budding technologies in the software fields.

We have independent setups to take care of projects on the Windows, UNIX and Linux based platforms. To provide quality services at a single point of access we have based our entire development center in Pune, but have our sales teams working at strategic locations in India (Pune, Hyderabad & Bangalore), Australia and the US.

Hosting Services: We have Dedicated Servers in India as well as in the US to cater to our clients hosting needs. Till date we have approximately 250 sites registered on our Servers.

SEO: We not only provide clients with web applications to help their business needs but also go a step further by providing them with Search Engine Optimisation to promote their business activities.

Maintenance & Support: Every system after implementation requires support for its expected output & error free usage. We are of the firm belief that the maintenance and support is an important phase of a project life cycle, a phase ignored by many. Our support team work in this areas to deliver a system in its totality.

After having worked in all the above areas we have accumulated a large base of satisfied clients motivating us to spread our wings over new horizons.

Outsource to us

The concept of outsourcing has given a new dimension to the world of information technology. It helps the client company to free its resources for key operations by transferring the time consuming and technological issues to a company providing such solutions. Some of the advantages of this concept are:

- I. Client company can focus on their core business
- II. Reduction of risks due to transfer to technological expertise.
- III. Higher customer satisfaction
- IV. Superior skill sets are made available at lower cost.
- V. Round the clock working due to time zone differences and increased productivity.

We at Cosmic understand the working of these projects as we have to our credit several such assignments completed successfully and duly implemented.

7. Why Cosmic

In the past few years India has emerged as a leading provider for offshore developments. India has a vast pool of highly skilled human resources backed by a very sound educational system. India has the necessary infrastructure available for such developments. Also the difference in the currency system makes it a very cost effective solution.

Pune is the educational hub of India and thus large number of trained professionals is available here. The infrastructure of the city facilitates large operations to be carried out here. Also its proximity to the financial capital of India, Mumbai makes it a highly valued business center. Also it is well connected to all the major cities in India through rail, road and air.

At Cosmic, we place a strong emphasis on continually upgrading the skill of employees. Every team-member approaches the project with complete preparation in the required technologies and methodologies.

We comprehend your requirements against the backdrop of today's highly competitive economy. Be it stress on quality, updated technologies or working in compressed timeframes. At Cosmic, innovation and ideas-leadership are prized virtues. We encourage new ideas and an inventive attitude.

Our pledge to outshine through innovation extends beyond IT and business. It is equally imperative how we administer our business operations - in our practices for management and leadership, and in how we build our physical, technology, or people infrastructure.
